

**Code of Conduct**

Members of the Australasian Bioplastics Association (ABA) undertake to accurately and ethically label and represent the properties and performance of their products under the following parameters.

1. Physical properties
2. Suitability for application
3. Processability
4. Biodegradability and compostability under various conditions
5. Claims of renewable resource / biobased content

Deliberate or inadvertent misrepresentation which is uncorrected may result in expulsion from the Association.
